SKILLS

- Languages:** C, c++, Java with DSA, j java, JavaScript
- Frameworks:** HTML and CSS, Bootstrap, React.js, Angular, Node.js
- Tools/Platforms:** MySQL
- Soft Skills:** Problem-Solving, Team Player, Project Management, Adaptability

PROJECTS

Handwritten Character Recognition by using OCR	May '23
Domain: Desktop Application.	
Technologies: Artificial Intelligence, Machine Learning.	
Description: Developed a desktop application that utilizes Optical Character Recognition (OCR) to accurately recognize and convert handwritten characters into digital text. Implemented machine learning algorithms to improve recognition accuracy and enhance user experience.	
Key Achievements:	
- Designed and trained a model for character recognition. - Achieved high accuracy in recognizing various handwriting styles. - Improved processing speed and efficiency of the application.	
jewelry shop	Mar '24
Html, CSS, JavaScript platform based on frameworks Bootstrap.	
- Constructed an application to manage University management system - To record store student and faculty Information. - Provide a platform to check student leave, faculty Leave, Ratings, and feedback.	
Hotel Management System:	Jun '24
Domain: Desktop Application Programming Languages: JAVA, Oracle.	
Constructed an application to manage Employee.	
Provide a platform to Employee Patient history, Ratings, and feedback.	
Android Developer	Sep '24
Note Taking App Development	
Platform: Kotlin	
Description: Currently developing a Note Taking app using Kotlin, focusing on user-friendly design and functionality. The app allows users to create, edit, and organize notes efficiently.	
Key Features:	
- Intuitive user interface for easy navigation. - Options for categorizing and searching notes. - Integration of cloud storage for data backup.
